

Tree Number Bonds

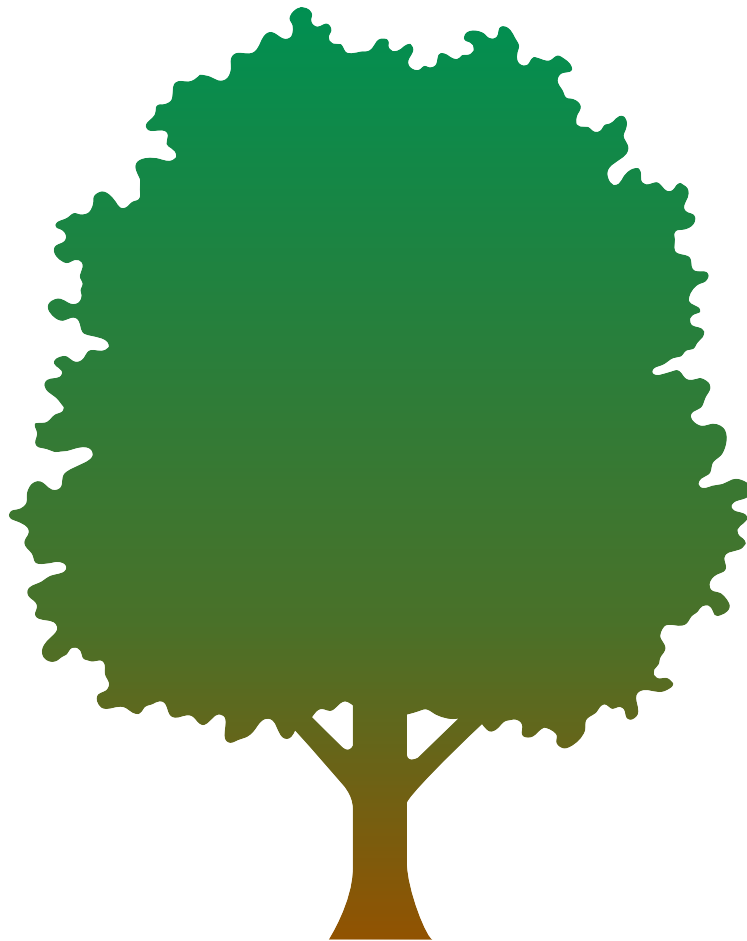

Goal: To make ten by putting apples on each side of the tree.

You will need: Tree and apples

What to do: Cut out the ten apples and place them in two groups, one on each side of the tree.

Find out:

- How many combinations of two groups of apples make ten?
- What happens if you switch the groups of apples; do you still have ten apples all together?
- What happens if you put all the apples on one side?

Apples for the tree
