

Six

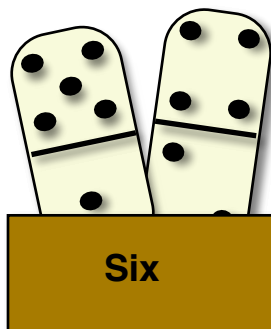

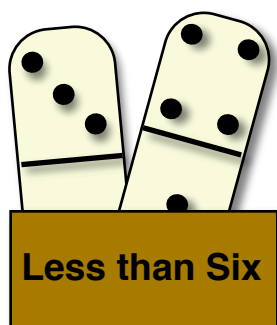

Goal: Sort a set of dominoes into three piles.

You will need:

- A set of double-six dominoes
- Three containers
- Labels for the containers

How to Play:

- Turn over all of the dominoes so the dots are not showing.
- Put labels on containers. Label one container with the word “six”, the next container with “more than six” and the third container with “less than six.”
- Place the dominoes in a pile. Pull one domino out of the pile at a time and add the number of dots on the two sides of the domino.
 - Say the sum of the dots out loud. Sums of 0, 1, 2, 3, 4, and 5 should be placed in the container marked “less than six.” Sums of 7, 8, 9, 10, 11, and 12 should be placed in the container marked “more than six.”
 - Only dominoes with a sum of six are placed in the container marked “six.” Keep playing until all of the dominoes are sorted into the right container.
