

A Pirate Ship

Goal: Use a growth mindset to make your own pirate ship!

You will need:

- Supply suggestions
 - Blankets and pillows
 - Foil
 - Sticks
 - String
 - Fabric scraps
 - Toy blocks
 - Recycled boxes

What to do:

- Decide to make a life size or a model pirate ship.
- Pick out the materials needed. For example, if you are making a life size model, blankets and pillows may work best.
- Then get creative and have fun!

To think about:

- What materials will you need to hold the pirate ship together?
- How could you use materials to make it stable?
- How do you plan to use the pirate ship? Will you get in it and have a fun afternoon of pretend?
- How would you make a model pirate ship that floats on water? What different materials can you use to keep it afloat?
