

Ladybug Number Bonds

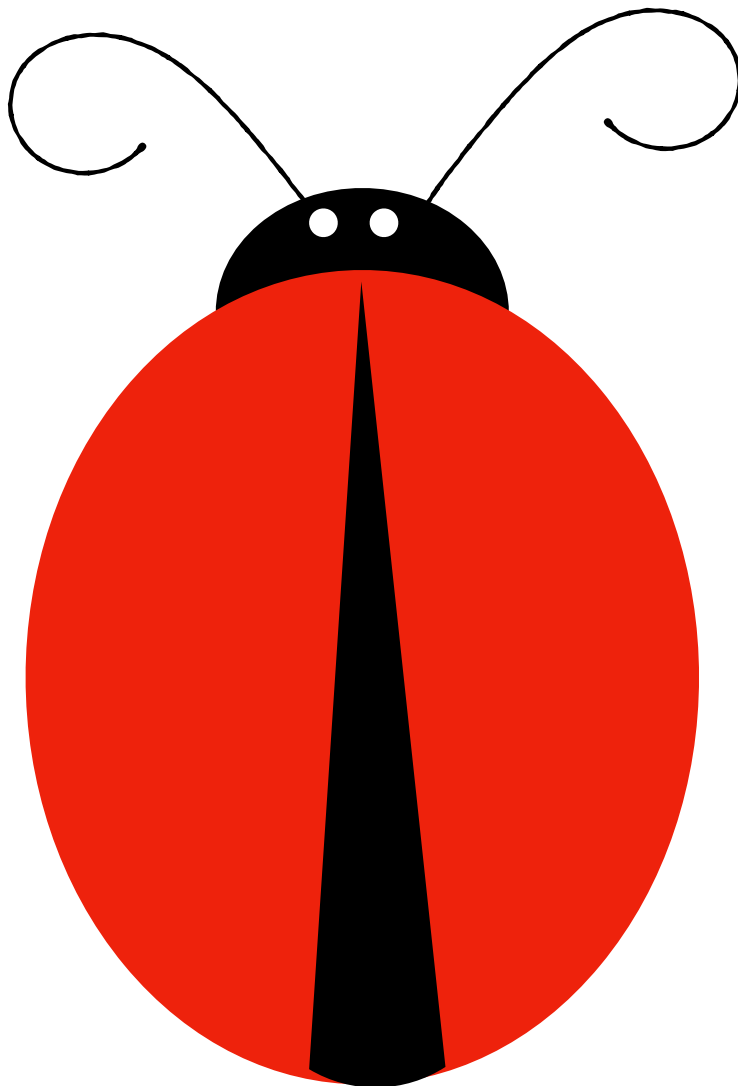

Goal: To make ten by putting spots on each side of the ladybug.

You will need: Ladybug and spots

What to do: Cut out the ten spots and place them in two groups, one on each side of the ladybug.

Find out:

- How many combinations of two groups of spots make ten?
- What happens if you switch the groups of spots; do you still have ten spots all together?
- What happens if you put all the spots on one side?

Spots for the ladybug
