

Bigger Shapes

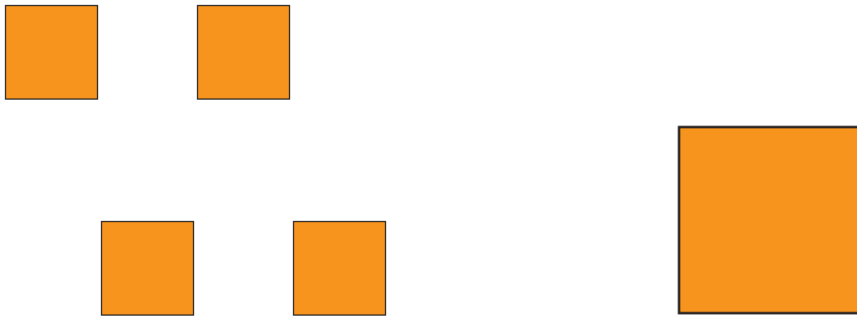

Similar shapes have the same shape, but not the same size.

Can you make a larger triangle out of only smaller triangles? If so, draw what you created.

Can you make a larger parallelogram out of only smaller parallelograms? If so, draw what you created.

Which pattern blocks can be used to make a larger similar shape as themselves?

An example is using 4 squares to make 1 larger square.

Are there any pattern blocks that can't be used to make a larger similar shape?
