

# Heart Number Bonds

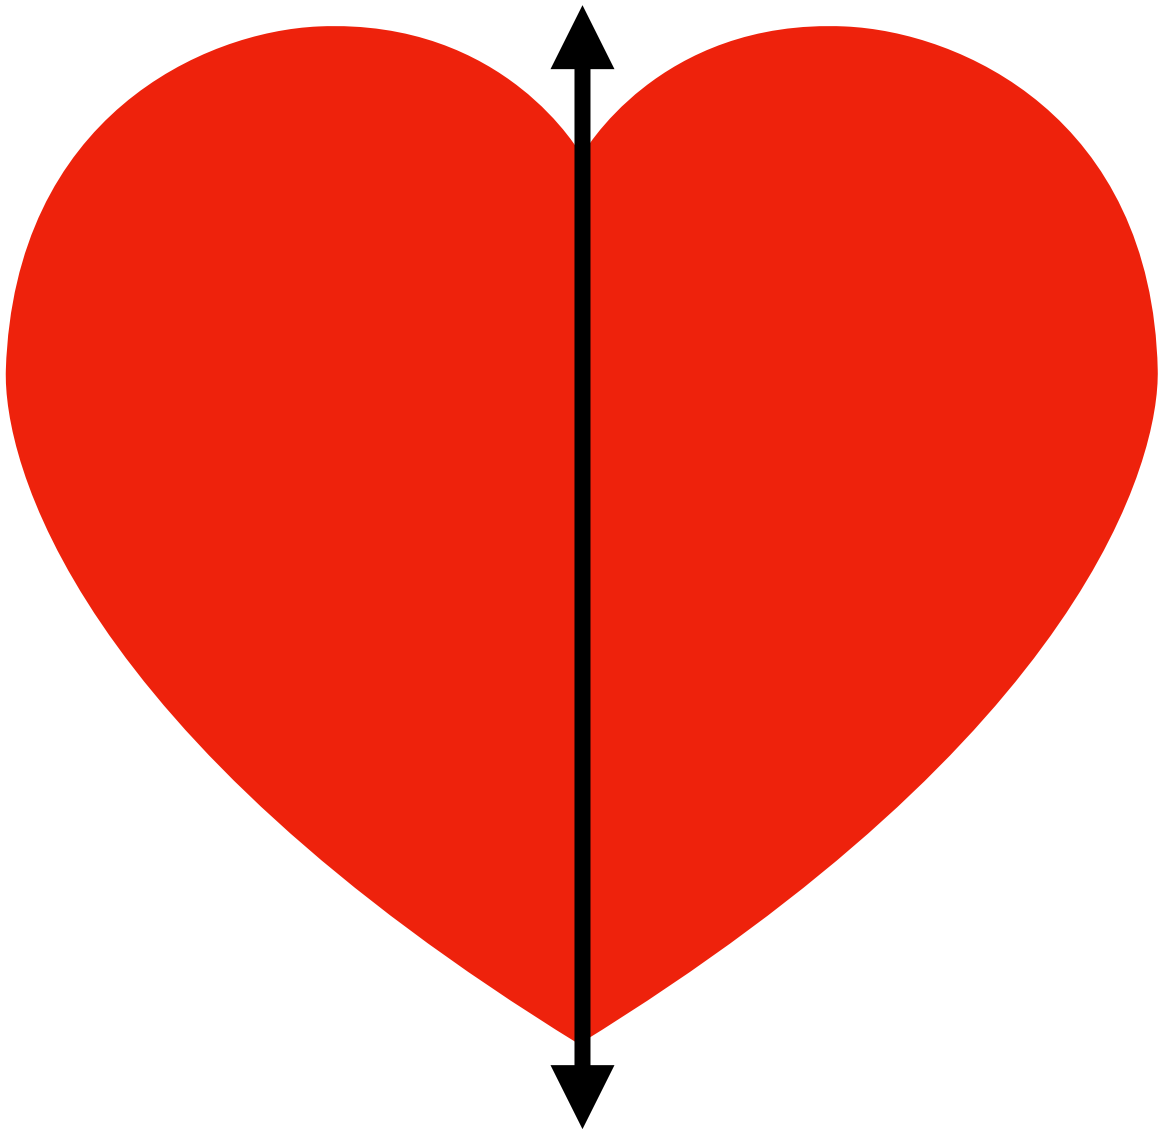

**Goal:** To make ten by putting shapes on each side of the heart.

**You will need:** Heart and shapes

**What to do:** Cut out the ten shapes and place them in two groups, one on each side of the heart.

**Find out:**

- How many combinations of two groups of shapes make ten?
- What happens if you switch the groups of shapes; do you still have ten shapes all together?
- What happens if you put all the shapes on one side?

Shapes for the heart
