

# Pattern Spinner

# Make a Pattern Spinner

Follow these steps to create a spinner. There are many ways to do this.

- Copy or draw the pattern spinner design above.

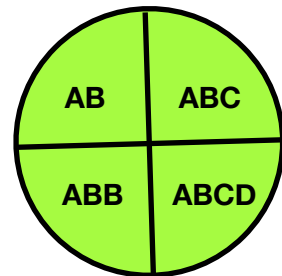

Then:

- Make a hole at the center of the spinner design where the two lines intersect. Use a paper fastener to attach a paperclip to the center of the circle so that it will spin freely when touched.

or

- Flip a small object (like a coin) into the air so it lands on the spinner face. The landing place of the object tells you what pattern to make.

## Other Approaches

- Repurpose a spinner from another game
- Write the names of the patterns on small pieces of paper. Put them into a bag. Pull a paper from the bag to select your pattern.
- Make a pattern dice by writing the names of the patterns on small stickers. The stickers could be pieces cut from a mailing label. Attach the stickers to the faces of a dice. Roll the dice to determine your pattern. You could add other pattern types to the dice. You could also write other directions on the stickers, such as “make two patterns” or “lose a turn”.
