

# Smallest to Largest

## You will need:

bubble solution

five cotton squares

a bubble wand

cotton gloves (if you want to handle the bubbles)

## Goal:

Arrange five bubbles in order from smallest to largest

## What to do:

Blow a bubble and transfer it onto a cotton square. Blow four more bubbles and transfer them to cotton squares too. Once your bubbles are resting on the squares, arrange them in order from smallest to largest. If a bubble pops before you arrange the bubbles in order, just blow another one!
