Seed Sorting

Seeds come in many shapes, sizes, and weights.

*Some are light and weigh almost nothing at all!*

*Others are large like this avocado pit.*

*You may have eaten pumpkin and sunflower seeds.*

*Some seeds, like these radish seeds, are small and round.*

*The maple seed has wings. It twirls as it falls.*

**Goal:** Sort the seeds into similar groups

**You will need:**
Seeds
A muffin tin

Decide how to sort the seeds. Will you sort by shape, size, weight, color, or some other way? Use the muffin tin to sort the seeds into groups. Tell someone how you grouped the seeds or ask them to guess how you did it.
